Leak-Free Tear-Free Long-Lasting

Our inserts eliminate wasted milk while nursing. The embedded silicon membrane will only let milk pass while the calf is suckling, functioning naturally like a real cows teat.

Control Flow

The implementation of an insert has allowed us to introduce a round milk opening at the tip of the nipple. This 2mm hole delivers consistent milk flow while the calf is suckling, increases longevity of the nipple and eliminates tearing. Narrowing the neck of the nipple in combination with our soft-touch synthetic rubber closely mimics a cows teat promoting nursing for adequate feeding.

Snap-on w/ insert

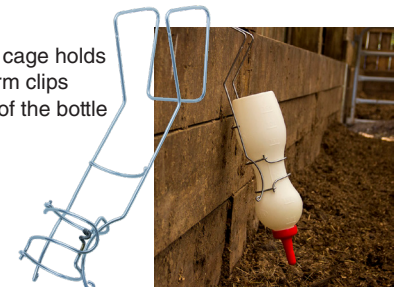

Clear	High-quality synthetic rubber to see inside nipple
Red	High-quality synthetic rubber
Pink	Standard quality synthetic rubber at lower cost

120C780	BESS Snap-on nipple	with insert, 2mm hole	clear
120C781	BESS Snap-on nipple	with insert, 2mm hole	red
120C779	BESS Snap-on nipple	with insert, 2mm hole	pink

Bottle Holder

Newly developed bottle cage holds all three sizes. Swing arm clips firmly around the waist of the bottle preventing knock-outs.

120C782	BESS Nursing Bottle	2qt w/ Snap-on	clear
120C783	BESS Nursing Bottle	3qt w/ Snap-on	clear
120C784	BESS Nursing Bottle	4qt w/ Snap-on	clear

120C785	BESS Nursing Bottle Holder	Metal
